Early Purple Sprouting Broccoli

Broccoli is a pretty reliable vegetable in most climates. We know that certain varieties' Thomas Hardy, English heelbom, can be grown in deep purple, and sweet knobby and hairy squabblers, are also called heathers. The purple sprouting broccoli is a winter vegetable. It is the best of both worlds. It can be consumed at the end of the growing season, and the plants will continue to grow in the spring.

Large American Flag Leek

The Large American Flag leek gets its name for its height! Also known as Giant Reddoubt, the leek grows up to 6 feet tall. The leek has a white base and blue-green leaves. The leek is a member of the Allium family. The leek is a member of the Allium family. The leek is a member of the Allium family.

Planting instructions:
Plant 1 leek 1 foot apart.

Blue Shelling Pea

The Dutch-originated Blue Shelling peas, also called Bluewischkoki or "blue pods" in their native tongue, are a purplish-blue pea that is well respected in both Europe and Canada. Their edible flowers are lavender and magenta. These edible flowers are selfers grow in darker purple pods. The peas themselves young like a snow pea, but when mature, are much tastier when shelled and dried for later use in soups.

-85 days

Planting Instructions

Plant Blue Shelling peas 1/2 inch deep, 2-3 inches apart, in a sunny area of your yard. Because these pea vines can grow to six feet in length, make sure to provide a trellis or other support structure for them to climb. Seedlings will emerge in 7-14 days. For peas that are perfect for soups, harvest in about 3 months.

Parisian Carrot

The Parisian carrot originated from 19th-century France and is adored by gourmet chefs throughout the world for its outstanding flavor. These carrots are round and resemble radishes in form. They are ideal specimens to grow in containers or heavy, rich, or rocky soil. The Parisian carrot is a highly desirable design when eaten raw or steamed.

Sowing instructions

Sow Parisian carrot seeds lightly, about 1 1/4 inch deep, in a full-sun location in your garden. Space apart approximately 12 inches. Sow in 14-day blocks. Space the Parisian carrot seeds so that a row is growing at all times.
